

BARNSEAL®

DURABILITY MEETS AGRICULTURE

Barnseal® polyurethane spray foam insulation is for use in agricultural applications. Two variations - high-density and medium-density - are available depending on your specific needs.

CLOSED-CELL

Both formulas were developed for use in poultry, dairy, equestrian, and farm and ranch applications where high performance is required at a lower cost.

Barnseal MD

R-value = 7.15 @ 1 inch

Density = 2.2 - 2.3 lb/ft³

Barnseal HD

R-value = 5.9 @ 1 inch

Density = 6 lb/ft³

SPECIFIC AGRICULTURAL FORMULAS FOR SPECIFIC NEEDS

CLOSED-CELL

Both formulas provide an air-tight seal, improved temperature control in barns and other ag-related structures, and can be applied quickly.

Barnseal MD (medium-density) is most commonly used for fruit and vegetable storage facilities, barns, stables, horse-riding arenas, dairies, and other buildings where a high R-value is necessary.

Barnseal HD (high-density) is most commonly used in poultry houses, as it is a more durable substance that is not damaged by chickens and turkeys pecking at the foam.

-
- Enhances ventilation control
 - Reduces energy consumption
 - Minimizes potential for mold and mildew growth
 - Increases production from livestock
 - Non-bloccide darkling beetle control
